

FACILITIES ARE IMPORTANT and Pacific State Bank has them, in abundance. A new main office in Hawthorne is "customer-designed" for friendliness with efficiency. Banking here is a pleasure. Service windows are cozy and confidential. Completely air-conditioned, of course.

YOU "AUTO" TRY Pacific State's new drive-in branch! It's smart, efficient and deposits are handled through electronic service windows. Hours are 9 to 4, Fridays 'til 6.

PSB SERVICE is the key to unusual growth and continued acceptance. The Bank's assets have doubled every two years since its formation, and customers now total more than 22,000. Similar growth is expected during 1963.

AUTOMATION OF ACCOUNTING

To free time for the personal attention to your banking needs, Pacific State Bank has automated the handling of day-to-day banking functions. When you make a deposit or cash a check your teller starts your transaction on its way to proper recording. You don't usually see this work, but you constantly get the benefit of fast, accurate accounting. First, your transaction is reviewed and properly marked by the Unit Inscriber so that the Magnetic

Ink Character Reader-Sorter can identify the correct account and relay this information on tape to the Data Processing System. At the same time the Reader-Sorter collects the checks for return to you. The Data System activates the Printer which prepares your monthly statement. The statement is matched with the checks and you get an accurate statement of your account—with PSB people free to provide the personal attention you need.
